

Can You Work and Receive Social Security Disability?

Q: How long does a typical social security disability benefits claim take?

A: Unlike some other government programs, social security disability benefit claims do not have to be processed in within a certain amount of time. Some cases take years to receive a decision. Others, make it through the process very quickly. The norm for a social security disability case being reviewed for the first time is about ninety days. Numerous things can lengthen the duration for a decision on your particular case. And there are things that you can do to increase the likelihood that your social security disability case does not hit snags that will slow down the process. The number one reason cases are held up is due to a wait for medical records. It is important, therefore, to assure that your complete medical records have been sent to the disability examiner handling your case. If a consultative exam is requested, make sure you do it. If you cannot be present at a particular exam, it is important that you reschedule. Incomplete or lack of current data about your condition will slow the review process and, possibly, eventually cause a denial of benefits. Get in touch with the representative handling your case, if you make any changes to your contact information. And do not ignore notifications or informational requirements sent to you by social security. It is important to cooperate when your social security disability case is being reviewed. Lastly, it is smart to touch base with the disability manager handling your case from time to time to check the status of your file.

Q: Do you have to be out of work for more than five months to submit an application for social security disability insurance?

A: You should apply for social security disability benefits as soon as you become injured and know that your condition will prevent you from working for at least 12 months. You do not have to wait a certain period of time before you submit an application. A decision on a case can vary from months to years, so it is advantageous to submit your application for benefits as soon as you can. If you are awarded benefits, you will not be eligible for your first payment until after a 5 month waiting period after the date of onset of your condition. Q: Are you allowed to work part time when you are waiting for a decision regarding social security disability insurance?

A: Yes, you can work while you are awaiting a decision regarding your application for social security disability. The amount you earn, not the fact that you are working, is what will affect your entitlement to benefits. You cannot earn above the limit Social Security has established as substantial gainful activity. That monthly amount is currently just under \$1000 pretax. Related sites [Social security attorney ...
