

## Submit your Blog

Blogging has recently caught on in popularity. Blogging is a great way to express your thoughts and feelings with the world. You publish what you write on blogging websites. You can make a lot of money by blogging too.

However, no one will know about your writing efforts unless you submit your blog to directories and search engines. You must submit your blog in order to get traffic to it. There are millions of blogs on the internet and billions of other web pages that are competing for traffic. The reality is that there is no way you can get your share of the traffic unless you submit your blog to the search engines and directories.

To be a successful blogger, especially if you want to make money at it, you must learn all you can about internet marketing too. You will need to learn about search engine rankings and all about links and back links. Your first priority should be to learn how to submit your blog.

You will be really at a disadvantage until you learn how to submit your blog. You will need to know which directories and search engines are the best ones to submit your blog to. Not just any directory online will be the right category for your blog. There are many different categories. If you submit your blog on the right directories the people who are searching for this category will be able to find you.

When you submit your blog to search engines it is very much like submitting your website. However, there are a few differences. If you know what the differences are you can get your blog indexed a lot faster.

The first thing you need to do if you want to submit your blog is to create a sitemap. This is especially true if you want to submit your blog to google. Sitemaps are something that google really likes. There is no need to submit the sitemap more than once but it is best to keep it updated for google. You can also submit your blog to MSN and Yahoo search engines as well. A lot of people like to use a blog like Wordpress because it has a sitemap plugin. An automatic update will be done when your site is changed. You can use googles free sitemap tools to create your sitemap if you are not using blogging software otherwise.

A good way to submit your blog to the blog directories is to use a site like Feed Shot. After that the only thing left to do is to ping your blog to update it at the directories you have submitted your blog to. Do your own blog search if you want to know more about how to submit your blog.
